

## Contract Research Services From Sample-To-Data

i-DNA offers fee-for-service for the detection and quantitation of DNA, RNA or protein directly from biological sample. Using state-of-the-art technologies, we deliver quality data from small amount of biological sample in high throughput, multiplex and fast turnaround. Our core technology platforms include:

**Luminex 200 System**

**ELISA**

**PCR**

Based in Singapore, our laboratory has the experience in the analysis of a wide range of disease-specific panels from minute amount of samples. Regardless on the size of project and quality of starting biological sample, we can work with known or unknown targets.

Our customers come from basic, pre-clinical and clinical research. The key benefits, our service brings to customer are:

- Delivery of results timely
- Expertise in handling small and difficult biological samples like FFPE and laser-captured samples.
- Customised to meet your specific research needs
- Value for money based on cost-per-data point
- Hassle-free from sample-to-data
